Gentile installatore, gentile utilizzatore,
ci complimentiamo con Lei per aver scelto un prodotto progettato e realizzato con tecnologie all'avanguardia.

Prima della consegna al cliente, l'apparecchiatura viene controllata e collaudata nelle officine del Fabbricante.

Il "foglio verifica processo produttivo" allegato alla stessa, garantisce che **ogni** passaggio del processo produttivo, dall'assemblaggio all'imballo, è stato accuratamente verificato, sia sotto il profilo della funzionalità che della sicurezza.

Questa guida rapida fornisce soltanto alcune **nozioni di base** per l'installazione, l'utilizzo e la manutenzione dell'apparecchiatura.

Su richiesta al Fabbricante sono disponibili i **libretti digitali estesi** che forniscono ogni tipo di informazione e consiglio riguardante l'apparecchiatura.

Prima dell'utilizzo, leggere **attentamente** il contenuto della presente guida, se qualche nozione non fosse chiara rivolgersi al Fabbricante per le adeguate spiegazioni.

EN

Dear installer, dear user,
we congratulate you for choosing a product designed and manufactured with cutting-edge technology.

Before delivery to the customer, the equipment is tested and inspected in the Manufacturer's factories.

The "production process check sheet" enclosed with it guarantees that **each** step in the production process, from assembly to packaging, was carefully checked from both the operating and safety standpoints.

This quick guide only provides some **basic notions** for equipment installation, use and maintenance.

Full digital booklets that provide every type of information and advice on the equipment are available upon request. Before use, **carefully** read this guide.

If any notion is not clear, please contact the Manufacturer for appropriate explanations.

FR

Cher installateur, cher utilisateur,
nous vous remercions d'avoir choisi un produit conçu et réalisé avec des technologies à l'avant-garde.

Avant la livraison au client, l'appareil est contrôlée et testée dans les ateliers du constructeur.

La "feuille de contrôle du processus de production" ci-joint, garantit que **chaque** passage du processus de production, à partir de l'assemblage à l'emballage, a été soigneusement vérifié autant en termes de fonctionnalité que de sécurité.

Ce guide rapide fournit seulement certaines **notions de base** pour l'installation, l'utilisation et l'entretien de l'appareil.

Sur demande au Constructeur sont disponibles les **livrets numériques étendus** qui fournissent tout type d'information et de conseil concernant l'appareil. Avant l'utilisation, lire **attentivement** le contenu du présent guide ; si quelques notions ne sont pas claires, adressez-vous au constructeur pour les explications opportunes.

DE

Sehr geehrter Installateur, sehr geehrter Benutzer,
wir gratulieren Ihnen zur Entscheidung für ein Produkt, das unter Anwendung von Avantgarde-Technologien entwickelt und gefertigt wurde.

Vor der Auslieferung an den Kunden wird die Gerät in den Werkstätten des Herstellers kontrolliert und einer Abnahmeprüfung unterzogen.

Das beiliegende „Prüfblatt Produktionszyklus“ garantiert, dass **jeder** Schritt des Produktionsprozesses von der Montage bis zur Verpackung sowohl hinsichtlich der Funktionalität, als auch hinsichtlich der Sicherheit sorgfältig überprüft wurde.

Diese Schnellanleitung liefert nur einige **grundlegenden Angaben** zur Installation, zur Benutzung und zur Wartung des Gerät.

Auf Anfrage sind beim Hersteller die **vollständigen digitalen Handbücher** verfügbar, die alle Informationen und Empfehlungen zum Gerät enthalten. Vor der Benutzung **aufmerksam** den Inhalt der vorliegenden Anleitung lesen und für Auskünfte an den Hersteller wenden, falls etwas nicht klar sein sollte.

ES

Estimado instalador, amable usuario,
le felicitamos por elegir un producto diseñado y fabricado con tecnología de punta.

Antes de ser entregada al cliente, el equipo es controlado y probado en los talleres del Fabricante.

La "hoja de control del proceso de producción" adjunta, garantiza que **cada** paso del proceso de producción, desde el ensamblaje hasta el embalaje, ha sido cuidadosamente verificado, tanto en términos de funcionalidad como de seguridad.

Esta guía rápida proporciona solo algunos **conceptos básicos** para la instalación, el uso y el mantenimiento del equipo.

A petición del fabricante, se encuentran disponibles **folletos digitales ampliados** que brindan todo tipo de información y asesoramiento sobre el equipo. Antes del uso, lea **atentamente** el contenido de esta guía, si alguna noción no está clara, póngase en contacto con el fabricante para obtener las explicaciones adecuadas.

RU

Уважаемый установщик, уважаемый пользователь,
поздравляем с выбором изделия, спроектированного и изготовленного с применением авангардных технологий.

Перед поставкой заказчику оборудования прошла проверку и пусконаладочные испытания в цехах Изготовителя.

«Листок испытания производственного процесса» прилагается к изделию и гарантирует, что **каждый** этап производственного процесса - от сборки до упаковки - тщательно проверен, как в отношении функциональности, так и в отношении безопасности.

Данное краткое руководство поясняет лишь некоторые **базовые понятия** по установке, эксплуатации и техобслуживанию оборудования.

По запросу в адрес Изготовителя доступны **подробные руководства в цифровом формате**, в которых представлена вся информация и рекомендации в отношении оборудования. Перед началом эксплуатации **внимательно** прочитайте содержимое настоящего руководства; если какие-либо понятия останутся неясными, обратиться к Изготовителю за подробными разъяснениями.

Installer warnings

- Read this guide carefully before installing the appliance, and keep it with care in an accessible place for any future consultation by the various operators.
- Moreover, the manual must always accompany the product through its life, even in case of transfer.
- Before any movement or installation, check that the room is suitable and systems comply with the installation country standards and the specifications indicated on the appliance rating plate.
- All installation, assembly and non-routine maintenance operations must be performed exclusively by qualified technicians that are authorised by the Manufacturer, in compliance with the regulations in force in the user country, and with the regulations on systems and work safety.
- These appliances are intended to be used for commercial applications, for example in restaurant kitchens, canteens, hospitals and commercial companies such as bakeries, butcher shops, etc., but not for the continuous and mass production of food. A use other than the stated one is considered improper, potentially dangerous for people and animals and might permanently damage the appliance. The improper use of the equipment shall void the warranty.
- Before performing any maintenance, replacing components or carrying out any routine/extraordinary cleaning, disconnect the electricity supply.
- Unauthorised actions, tampering or modifications that do not follow the information provided in this manual can cause damages, injuries or fatal accidents and null and void the warranty.
- It is forbidden to install the oven in environments at risk of explosion.
- Installation or maintenance that fails to comply with the instructions in this manual may cause damage, injury or fatal accidents.
- Persons not involved with the appliance installation may not pass through or stand in the work area during appliance assembly.
- The serial plate provides important technical information. This is vital in case of a request for

maintenance or repair of the equipment: please do not remove, damage or modify it.

- Failure to follow these regulations may cause damage or even fatal injury, subsequently invalidating the guarantee and relieving the Manufacturer of all liability.
- Caution, suffocation hazard! If left unattended, packaging could be potentially dangerous for both children and animals.
- Caution, hindrance hazard! If left unattended, packaging could hinder vehicles and installers during assembly operations.

User warnings

- Read this guide carefully before using and maintaining the appliance, and keep it with care in an accessible place for any future consultation by the various operators.
- Moreover, the manual must always accompany the product through its life, even in case of transfer.
- Before performing any maintenance, disconnect the electricity supply.
- Unauthorised actions, tampering or modifications that do not follow the information provided in this manual can cause damages, injuries or fatal accidents and null and void the warranty.
- Use or maintenance that fail to comply with the instructions in this manual may cause damage, injury or fatal accidents.
- The serial plate provides important technical information. This is vital in case of a request for maintenance or repair of the equipment: please do not remove, damage or modify it.
- Some parts of the equipment can reach high temperatures. We recommend you avoid pressing surfaces and do not get materials either flammable or sensitive to heat near the appliance.
- Do not rest objects on the oven, above all if built in material sensitive to heat.
- These appliances are intended to be used for commercial applications, for example in restaurant kitchens, canteens, hospitals and commercial companies such as bakeries, butcher shops, etc., but not for the continuous and mass production of food. A use other than the stated one is considered improper, potentially dangerous for people and animals and might permanently damage the appliance. The improper use of the

equipment shall void the warranty.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision and instruction concerning the use of the appliance in a safe way and understand the hazard involved. Children must not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- To clean the appliance, any of its components or accessories and the sub-structure DO NOT use:
 - aggressive, abrasive, powder or corrosive detergents (e.g. hydrochloric or sulphuric acid, caustic soda, etc.).
 - abrasive or sharp tools (e.g. abrasive sponges, scrapers, steel brushes, etc.);
 - steamed or pressurised water jets.
- The staff using the appliance must be professionally prepared and periodically trained on its use, as well as the safety and accident prevention regulations.
- Children must be supervised to make sure they do not play with the appliance or parts of it.
- Always use tools resistant to heat (e.g. In steel). Cooking utensils in plastic or similar material might not withstand the oven high temperatures.
- Check regularly that fumes can be discharged safely. Do not obstruct the duct for any reason.
- FIRE RISK: leave the area around the appliance free and clean from fuels. Do not store flammable materials near this appliance.
- WARNING: RISK OF EXPLOSION! It is forbidden to use the oven in environments at risk of explosion.
- WARNING: always switch off the main switch when you finish using the appliance, above all during cleaning or in cases of prolonged downtime.
- If you notice any anomaly (e.g. damaged power cable, etc.), malfunction or fault, do not use the appliance and contact a Service Centre authorized by the Manufacturer. Demand original spare parts, or the Warranty will be null and void.
- Place the emergency phone numbers in a visible location.
- WARNING: it is forbidden to place flammable solids or liquids (spirits for instance) in the cooking chamber during the operation.
- Monitor the appliance during its entire operation, do not leave dishes in the oven unattended!
- Failure to follow these regulations may cause

damage or even fatal injury, subsequently invalidating the guarantee and relieving the Manufacturer of all liability.

- We recommend you have the appliance checked by an Authorized Service Centre at least once a year.

Symbols used in the manual and on the labels applied to the machine

Indicates that caution is required when performing an operation described in a paragraph that bears this symbol. The symbol also indicates that maximum operator awareness is required in order to avoid unwanted or dangerous consequences

Reference to another chapter where the subject is dealt with in more detail.

Manufacturer's tip

Indicates that the surfaces marked with this symbol may be hot and must therefore be touched carefully

Dangerous voltage

The symbol identifies the terminals which, connected to each other, carry the various parts of a device or system to the same potential (not necessarily the earth potential)

Indicates that it is necessary to read carefully the paragraph marked with this symbol before installing, using and maintaining the equipment

The company cannot be held liable for any print or transcription errors, reserving the right to make changes where deemed suitable without prior notice.

Partial reproduction without the manufacturer's consent is prohibited. Measurements are purely indicative and not binding. The original language used to prepare this manual is Italian: the Manufacturer is not responsible for any translation/interpretation or print errors.

La distanza minima laterale è di 50 mm [1,97 in.], tuttavia si consiglia di lasciare uno spazio libero di 500 mm [19,7 in.] sul fianco destro per facilitare l'accesso all'impianto elettrico. Se ciò non fosse possibile, in caso di intervento, sarà necessario spostare il forno dal suo alloggiamento con sistemi adeguati.

The minimum side distance is 50 mm [1.97 in.], However we recommend you leave a gap of 500 mm [19.7 in.] on the right side* to make access to the electrical system easier. If this is not possible, in case of intervention, it will be necessary to move the oven from its housing with suitable systems

La distance latérale minimale est de 50 mm [1,97 in.]. Il est toutefois conseillé de laisser un espace libre de 500 mm [19,7 in.] du côté droit* pour faciliter l'accès au système électrique. Si cela n'est pas possible, il faudra déplacer le four de son logement à l'aide de systèmes adaptés en cas d'intervention.

Der seitliche Mindestabstand beträgt 50 mm [1,97 in.]; wir empfehlen jedoch, einen Abstand von 500 mm [19,7 in.] auf der rechten Seite einzuhalten, um den Zugang zur elektrischen Anlage zu vereinfachen. Falls dies nicht möglich ist, muss der Ofen bei Eingriffen mit geeigneten Systemen aus seinem Fach entfernt werden.

La distancia lateral mínima es de 50 mm [1,97 pulgadas], sin embargo, se recomienda dejar una distancia de 500 mm [19,7 pulgadas] en el lado derecho* para facilitar el acceso al sistema eléctrico. Si esto no es posible, será necesario mover el horno de su alojamiento mediante sistemas adecuados

Минимальное расстояние сбоку составляет 50 мм [1,97 in.], однако рекомендуется оставить свободное пространство в 500 мм [19,7 in.] с правой стороны* для облегчения доступа к электрооборудованию. Если это невозможно, в случае необходимости проведения работ потребуется сдвинуть печь с ее основания соответствующими системами.

EN Transport

► **Fig.1.** Fitted with personal protection equipment, transport the appliance to the installation location. Use a suitable vehicle capable of withstanding the weight of the same.

Model	single	double	Model	single	double
PAOLO	122 kg [268,9 lb]	209 kg [460,7 lb]	TP635L	159 kg [350,5 lb]	278 kg [612,8 lb]
TP635	160 kg [352,6 lb]	271 kg [597,4 lb]	TP935	207 kg [456,3 lb]	385 kg [848,7 lb]

Persons not involved with the appliance installation may not pass through or stand in the work area during the transport of the appliance. During the transport, pay particular attention to passing through openings and/or doors.

Preliminary operations

► **Fig.2.** Carefully remove the protective film.

If any glue residue is left on the surfaces, remove it with soapy water but without any corrosive or abrasive products or sharp or pointed instruments.

⚠ Check that all the parts making up the oven are in good condition and without any faults or breakages, if that is not the case, contact the Retailer for the procedures to follow.

Positioning

The positioning room must comply with the instructions provided in ► **Fig.3.**

► **Fig.4.** The oven must be placed on a base, built by the Manufacturer or by yourself that:

- is flame and heat resistant;
- is perfectly stable and level;
- withstands the weight of the appliance.

In both cases, silicone the gap between the oven and the support or the bearing surface, using high temperature resistant silicone (for USA versions only).

Comply with the measurements shown in the figure. ► **Fig.5.**

Serial number plate reading

► **Fig.6.** The serial number is on the right hand side of the appliance. It provides important technical information that is vital in case of a request for maintenance or repair of the appliance: please do not remove, damage or modify it.

Smoke extraction

The oven is fitted with a flue in the top to get rid of the steam from the cooking chamber.

This steam, together with the one from the door during the work phases, **must be conveyed outside** in one of the following ways:

► **Fig.7.**

A through a **hood supplied by the Manufacturer** that ensures perfect compatibility with the oven. For correct assembly and fixing to the oven, see the sheet attached to it; the evacuation flue must be for the exclusive use of the appliance, comply with current regulations and have a diameter that allows the passage of a **ø150 mm [Ø 5.91 in.]** evacuation pipe which corresponds to the diameter of the tube to be fitted on the hood (not supplied).

B through a **hood** belonging to the user, of suitable capacity, placed at about **300 mm [Ø 11.81 in.]** from the oven;

C through an adequate **extraction system** supplied by the user connected to the oven flue: in this case a draught switch must be installed between the extractor and the oven chimney (the extractor, switch and tube are not supplied by the Manufacturer). In this type of installation, the fumes resulting from the opening of the door will not be extracted.

Electrical connection

⚠ The electrical connection must be carried out **exclusively** by qualified personnel after reading the safety warnings at the beginning of the manual.

⚠ Before installing the appliance, **check that systems comply with the regulations in force** in the country where it is going to be used and **with the specifications indicated on the appliance rating plate** on the RH side of the oven.

► **Fig.9.** The appliance is supplied without either power cable or plug: they must both be fitted by qualified personnel. The cable must be only **of the type stated** and the plug fitted to it must be suitable for the consumption and connection of the oven to the electrical mains.

⚠ If the oven is fitted with a double chamber, there are two power cables and two plugs. To connect the cable to the appliance, remove the RH side panel of the oven, let the cable through the cable gland provided and connect it to the terminal block correctly.

For a correct electrical connection, the appliance must:

- be included in an **equipotential system** in compliance with the legislation in force. This connection must be made between the various devices with the terminal marked with the equipotential symbol . The cable must have a maximum cross-section of 10 mm² (in compliance with IEC EN 60335-2-42:2003-09) and must be yellow-green;
- must be **grounded**  to the mains (green-yellow wire);
- must be connected to a **thermal differential switch** in compliance with the regulations in force (0.03A A type);
- must be connected to an **omnipolar circuit breaker** allowing complete disconnection in overvoltage III category conditions.

The Manufacturer accepts no liability for failure to comply with the above.

⚠ If required, the cable can be replaced by the Dealer or its technical service or by a person with similar qualifications to prevent any risk.

IT Precollaudo e collaudo

Prima della consegna al cliente, il forno viene controllato e collaudato nelle officine del Fabbricante. Il "foglio verifica processo produttivo" allegato allo stesso, garantisce che **ogni** passaggio del processo produttivo, dall'assemblaggio all'imballo, è stato accuratamente verificato, sia sotto il profilo della funzionalità che della sicurezza. Terminare spiegando all'utente come utilizzare in maniera ottimale e sicura l'apparecchiatura e come effettuare le operazioni di ordinaria manutenzione e di pulizia.

Verifica del funzionamento e prima accensione

Mettere in funzione l'apparecchiatura seguendo quanto riportato nel manuale di "Uso e Manutenzione" allegato alla stessa: sorvegliarla durante tutta la prova e verificare il corretto funzionamento di tutti i componenti elettrici. **Al primo utilizzo**, si raccomanda di impostare la temperatura ad un valore di **150 °C / 302 °F**, **"MAX"** al cielo e **"MIN"** alla platea, per almeno **8 ore, senza introdurre alimenti all'interno**. Se è presente una cappa di aspirazione si consiglia di tenerla accesa. In questa prima fase il forno, a causa dell'evaporazione dell'umidità dei materiali isolanti, produrrà fumi e odori sgradevoli che scompaiono gradualmente nei successivi cicli di funzionamento.

FR Pré-essai et essai

Avant la livraison au client, le four est contrôlé et testé dans les ateliers du Fabricant. La « feuille de contrôle du processus de production » ci-joint, garantit que **chaque** passage du processus de production, de l'assemblage jusqu'à l'emballage, a été soigneusement vérifié tant sous le profil de la fonctionnalité que de la sécurité. Terminez en expliquant à l'utilisateur comment utiliser de manière optimale et sûre l'appareil et comment effectuer les opérations d'entretien ordinaire et de nettoyage.

Vérification du fonctionnement et premier allumage

Mettez l'appareil en marche en suivant les indications du manuel « Utilisation et Entretien » joint à celui-ci : surveillez-le durant l'essai et vérifiez le bon fonctionnement de tous les composants électriques. **Dès la première utilisation**, nous conseillons de programmer la température à une valeur de **150 °C / 302 °F**, **"MAX"** en voûte et **"MIN"** en sole, pendant au moins **8 heures, sans introduire d'aliments à l'intérieur**. Si une hotte d'aspiration est présente, il est conseillé de la laisser allumée. Durant cette première phase, l'évaporation de l'humidité des matériaux isolants produira des fumées et des odeurs désagréables qui disparaîtront progressivement dans les cycles de fonctionnement successifs.

ES Pre-pruebas y pruebas

Antes de la entrega al cliente, el horno se revisa y prueba en los talleres del Fabricante. La "hoja de verificación del proceso de producción" que se adjunta, garantiza que cada paso del proceso de producción, del ensamblaje al embalaje, ha sido controlado, desde el punto de vista de la funcionalidad y de la seguridad. Termine de explicarle al usuario cómo usar el equipo de manera óptima y segura y cómo llevar a cabo operaciones de mantenimiento y limpieza de rutina.

Comprobación del funcionamiento y primer encendido

Opere el equipo siguiendo las instrucciones del manual "Uso y mantenimiento" que se le adjunta: controle durante toda la prueba y verifique que todos los componentes eléctricos funcionen correctamente. **En el primer uso**, se recomienda ajustar la temperatura en un valor de **150 °C / 302 °F**, **"MAX"** en el techo y **"MIN"** en la solera, durante por lo menos **8 horas, sin introducir alimentos en su interior**. Si la campana de aspiración está presente, recomendamos mantenerla encendida. En esta primera fase, el horno, debido a la evaporación de la humedad de los materiales aislantes, producirá humos y olores desagradables que desaparecerán gradualmente en los siguientes ciclos operativos.

EN Pre-testing and final inspection

The oven is checked and tested in the Manufacturer's plant before being delivered to the customer. The "production process check sheet" enclosed with it guarantees that **each** step in the production process, from assembly to packaging, was carefully checked from both the operating and safety standpoints.

Finish off explaining to the user how to use the appliance in an optimal and safe way and how to carry out ordinary maintenance and cleaning.

Checking the operation and first start-up

Start the appliance following the instructions in the "Use and Maintenance" manual annexed: monitor it during the whole test and check that all the electrical components work properly. The **first time** you use the oven, we recommend you set the temperature at **150 °C / 302 °F**, **"MAX"** at the top and **"MIN"** in the bottom for at least **8 hours without placing any food inside**. If a hood is fitted, we recommend it is kept ON. In this first phase, because of the humidity evaporating from the insulating materials, the oven will give out unpleasant smells and fumes that will gradually disappear during the following operating cycles.

DE Vorabnahme und Abnahmeprüfung

Vor der Auslieferung an den Kunden wird der Ofen in der Werkstatt des Herstellers einer Abnahmeprüfung unterzogen. Das beiliegende „Prüfblatt Produktionsprozess“ garantiert, dass alle Schritte des Produktionsprozesses von der Montage bis zur Verpackung sowohl hinsichtlich der Funktionalität, als auch hinsichtlich der Sicherheit sorgfältig überprüft worden sind. Zum Abschluss dem Benutzer erklären, wie das Gerät auf optimale und sichere Weise benutzt wird und wie die ordentlichen Wartungs- und Reinigungsarbeiten durchgeführt werden.

Überprüfung der Funktionsweise und erstes Einschalten

Bei der Inbetriebnahme des Geräts die Angaben des beiliegenden Handbuchs „Benutzung und Wartung“ befolgen: Das Gerät während des gesamten Tests überwachen und den ordnungsgemäßen Betrieb der elektrischen Komponenten überprüfen. **Bei der ersten Benutzung** die Temperatur auf einen Wert von **150 °C / 302 °F**, **"MAX"** für die Oberhitze und **"MIN"** für die Unterhitze einstellen, für zumindest **8 Stunden, ohne Lebensmittel in den Ofen zu stellen**. Falls die Haube vorhanden ist, empfehlen wir, sie eingeschaltet zu lassen. In dieser ersten Phase erzeugt der Ofen aufgrund der Verdampfung der Feuchtigkeit der Isolierungsmaterialien unangenehme Abgase und Gerüche, die während der nachfolgenden Betriebszyklen nach und nach verschwinden.

RU Предварительные проверки и пусконаладочные испытания

Перед поставкой заказчику печь прошла проверку и пусконаладочные испытания в цехах Изготовителя. «Листок испытания производственного процесса» прилагается к изделию и гарантирует, что **каждый** этап производственного процесса - от сборки до упаковки - тщательно проверен, как в отношении функциональности, так и в отношении безопасности. Завершить, объяснив пользователю оптимальный и безопасный порядок эксплуатации оборудования, а также выполнение операций планового техобслуживания и чистки.

Проверка функционирования и первое включение

Включить оборудование, следуя указаниям, приведенным в «Руководстве по эксплуатации и техническому обслуживанию», прилагаемому к нему: руководствоваться им на протяжении всех испытаний и проверить правильность функционирования всех электрических компонентов. **При первом использовании** рекомендуется установить температуру на значение **150 °C / 302 °F**, **"МАКС."** для верхней части и на **"МИН."** для дна минимум на **8 часов, не помещая в печь продукты питания**. При наличии вытяжки рекомендуется оставить ее включенной. На этом первом этапе печь, по причине испарения влаги из изолирующих материалов, производит дым и неприятные запахи, которые постепенно будут исчезать во время следующих циклов работы.

EN Knowing your oven

Your oven can be used only to bake pizzas or similar dishes, such as bread or focaccia and to grill vegetables.

The oven can manage the temperature of the cooking chamber and separately the power of the top and bottom.

Preparing to use the oven

Clean the oven and any accessories accurately, both externally and internally, following the instructions in the dedicated chapter rigorously.

Maintenance and cleaning - pag. 39.

The **first time** you use the oven, we recommend you set the temperature at **150 °C / 302 °F**, "**MAX**" at the top and "**MIN**" in the bottom for at least **8 hours without placing any food inside**. If a hood is fitted, we recommend it is kept ON. In this first phase, because of the humidity evaporating from the insulating materials, the oven will give out unpleasant smells and fumes that will gradually disappear during the following operating cycles.

Knowing the control panel

► Fig.10.

- 1 **Temperature knob**
Allows setting the chamber temperature
- 2 **Pyrometer**
Displays the temperature in the cooking chamber.
- 3 **White warning light**
If ON, it shows the top elements are heating
- 4 **Top power check**
Allows checking the power of the elements in the top, offering three adjustments:
 - OFF
 - MIN = 33%
 - MAX = 100%
- 5 **White warning light**
If ON, it shows the bottom elements are heating.
- 6 **Bottom power check**
Allows controlling the power of the elements in the bottom, offering three adjustments:
 - OFF
 - MIN = 33%
 - maximum (MAX = 100%)
- 7 **Light switch**
Switches the light in the cooking chamber on and off.
- 8 **ON/OFF switch**
Switches the oven on and off.

 Some parts of the equipment can reach high temperatures. We advise you to avoid touching surfaces and not to get materials either flammable or sensitive to heat near the appliance. Do not rest objects on the oven, above all if built in material sensitive to heat. Take care and use personal protection equipment (i.e. gloves) when putting food into the cooking chamber or getting it out.

Use guided procedure

A - Turning the oven on

► **Fig.11.** Pressing the **ON/OFF** key supplies the oven.

B - Setting the preheating

► **Fig.10.** Rotate the "chamber" temperature knob (1) and knobs (4) and (6) "top" power and "bottom" power respectively to set the same cooking parameters as the recipe you wish to use.

After the settings, the oven immediately begins to heat, however, it is necessary to wait about an hour before putting the products in the oven, so that the oven reaches an optimal temperature and is ready for cooking.

► **Fig.12.** The white warning lights (3) and (5) will remain on until the set temperature is reached; their going off means that preheating is complete and the oven is ready for cooking. The thermostat controlling the elements will keep the set temperature constant, switching the elements on and off as required.

C - Starting cooking

► **Fig.13.** Once preheating is complete, you can start cooking and bake the products using personal protection equipment (e.g. gloves) and tools suitable for contact with food and made of material resistant to high temperatures (e.g. steel).

For optimal results, always adhere to the oven capacity declared by the Manufacturer and position the products to be cooked evenly in the cooking chamber.

During cooking, it is always possible to change the temperature or the top and bottom power acting as usual.

D - Switching the light on (optional)

► **Fig.14.** With the oven both off and on, the light can be switched on pressing the **light** key (7), as required. Press the same key to switch it off.

E - Switching the oven off

► **Fig.15.** To switch the oven off with the **ON/OFF** key.

EN Warnings

 Before any cleaning, it is necessary to **switch off the power** to the appliance (acting on the system switch) and wear suitable personal protection equipment (e.g. gloves, etc.). The user must carry out only routine maintenance, for extraordinary maintenance, contact a Service Centre requesting service from an authorised technician. The Manufacturer warranty does not cover damages due to negligent or incorrect maintenance or cleaning (e.g. use of unsuitable detergents).

 **Any cleaning must be carried out with the oven completely cold and wearing adequate personal protection devices (e.g. gloves, etc.).**

 When cleaning any part or accessory do NOT use:

- abrasive or powder detergents;
- aggressive or corrosive detergents (e.g. hydrochloric or sulphuric acid, caustic soda, etc.). Caution! Never use these substances also when cleaning the substructure/floor under the appliance or its base;
- abrasive or sharp tools (e.g. abrasive sponges, scrapers, steel brushes, etc.);
- steamed or pressurised water jets.

 It is best to have a Service Centre perform maintenance and inspection on the appliance at least once a year to ensure top working and safety conditions.

Keep the vents of the electrical compartment clean and clear.

Oven cleaning

Cleaning the external steel parts

Use a cloth dampened with hot soapy water and end with rinsing and drying.

Cleaning the glass

Clean any glass with a soft cloth and special glass detergent.

Cleaning the control panel

Clean the control panel with a soft cloth and a little detergent for delicate surfaces.

Avoid also using very aggressive detergents that may damage the construction material (polycarbonate).

► Fig.17. Cleaning the refractory surface

 On the refractory surface, there are normally some food residues (e.g. fat, food residues, etc.) that must be removed frequently for health and safety reasons.

Remove the coarser food residues with a natural fibre brush; then, if necessary, remove the refractory bricks of the cooking surface as shown in the figure and suck the carbonized residues accumulated under them on the bottom of the oven with an ash extraction bin.

Never use liquids to clean the refractory surface.

 While reinserting the bricks, be careful not to pinch your fingers.

 Replacement refractory bricks can be obtained from the Manufacturer on request.

If the use of a natural fibre brush to eliminate food residues from the refractory surface is not sufficient, see chapter "Setting the pyrolysis parameters".

Setting the pyrolysis parameters

Pyrolysis is a thermochemical crystallization process of food residues that have deposited in the cooking chamber, which takes place by bringing the oven up to 400°.

 Before starting the pyrolysis, remove the coarser food residues with a natural fibre brush.

► Fig.18.

(A) Rotate "chamber" temperature knob **(A)** clockwise to set a temperature of **400°C/752°F**;

(B) set the **top power** to **MAX**;

(C) set the **bottom power** to **MAX**;

(D) switch the lights in the cooking chamber off.

► Fig.19.

When the set temperature is reached, switch the oven off using the **ON/OFF** key and let it cool with the door closed.

► Fig.20.

With a cold oven, clean the chamber from the crystallized food residues using a natural fibre brush and then vacuum with an ash extraction bin.

IT Smaltimento a fine vita

Per evitare un eventuale utilizzo non autorizzato e i rischi ad esso connessi prima di smaltire l'apparecchiatura assicurarsi che non sia più possibile utilizzarla: a tal fine il cavo di alimentazione va tagliato o rimosso (ad apparecchiatura scollegata dalla rete elettrica).

Smaltimento apparecchiatura

Ai sensi dell'art. 13 del Decreto Legislativo n. 49 del 2014 "Attuazione della Direttiva RAEE 2012/19/EU sui rifiuti di apparecchiature elettriche ed elettroniche" Il marchio del cassonetto barrato con barra specifica che il prodotto è stata immesso sul mercato successivamente al 13 agosto 2005 e che alla fine della propria vita utile non deve venire assimilato agli altri rifiuti ma deve essere smaltito separatamente. Tutte le apparecchiature sono realizzate con materiali metallici riciclabili (acciaio inox, ferro, alluminio, lamiera zincata, rame, ecc.) in percentuale superiore al 90% in peso. E' necessario porre attenzione alla gestione di questo prodotto nel suo fine vita riducendo gli impatti negativi sull'ambiente e migliorando l'efficacia d'uso delle risorse, applicando i principi di "chi inquina paga", prevenzione, preparazione per il riutilizzo, riciclaggio e recupero. Si ricorda che lo smaltimento abusivo o non corretto del prodotto comporta l'applicazione delle sanzioni previste dalla corrente normativa di legge.

FR Élimination en fin de vie utile

Pour éviter toute utilisation non autorisée et les risques qui y sont liés avant l'élimination de l'appareil, assurez-vous qu'il ne soit plus possible de l'utiliser : pour cela, le câble d'alimentation doit être coupé ou retiré (avec un appareil débranché du réseau électrique).

Faites en sorte qu'aucun enfant puisse rester accidentellement coincé à l'intérieur de la chambre du four en jouant ; pour cela, verrouillez l'ouverture de la porte (par exemple, avec du ruban adhésif ou des butées).

Élimination de l'appareil

En vertu de l'art. 13 du décret-loi n° 49 2014 « Mise en œuvre de la directive DEEE 2012/19 / UE sur les déchets des équipements électriques et électroniques » Le logo de la poubelle barrée spécifie que le produit a été mis sur le marché après le 13 Août 2005 et qu'à la fin de sa vie utile, il ne doit pas être assimilée à d'autres déchets, mais doit être collecté séparément. Tous les appareils sont réalisés avec des matériaux métalliques recyclables (acier, inox, fer aluminium, tôle galvanisée, cuivre, etc.) dans une quantité supérieure à 90% en poids. Il est nécessaire de faire attention à la gestion de ce produit à la fin de sa vie utile en réduisant les impacts négatifs sur l'environnement et en améliorant l'efficacité d'utilisation des ressources, en appliquant les principes de « pollueurs payeurs », prévention, préparation pour la réutilisation, recyclage et récupération. Ne pas oublier que l'élimination abusive du produit comporte l'application des sanctions prévues par la réglementation législative en vigueur.

EN Disposal at end of life

To avoid any unauthorised use and associated risks, before discarding the machine make sure it cannot be used; for this purpose, cut and remove the power cord (once the equipment is unplugged).

Make sure no child can accidentally remain trapped inside the cooking chamber, locking the door (for example, with adhesive tape or locks).

Equipment disposal

Pursuant to art. 13 of Legislative Decree no. 49 of 2014 "Implementation of WEEE directive 2012/19/EU on electric and electronic waste", the barred bin symbol specifies that the product was introduced on the market after August 13, 2005 and that it must not be discarded with other waste at the end of its working life but disposed of separately. All the equipment has been made with recyclable metal materials (stainless steel, iron, aluminium, zinc plate, copper, etc.) that as a percentage make up more than 90% of the weight. Attention must be paid to the management of this product at the end of its life, reducing any negative impact on the environment and improving the efficiency of resources, applying the principles of "who pollutes pays", prevention, preparation for re-use, recycling and recovery. Please remember that illicit or incorrect product disposal is punishable by law.

DE Entsorgung am Ende der Lebensdauer

Um eventuelle unbefugte Verwendungen und die damit verbundenen Risiken zu vermeiden, vor der Entsorgung des Geräts dafür sorgen, dass dieses nicht mehr verwendet werden kann: zu diesem Zwecke ist das Netzkabel durchzuschneiden oder zu entfernen (bei von der Stromversorgung getrenntem Gerät).

Sicherstellen, dass keine Kinder versehentlich in der Garkammer eingeschlossen werden kann: Dazu die Öffnung der Tür blockieren (zum Beispiel mit Klebeband oder Anschlägen).

Entsorgung des Gerätes

Gemäß den Bestimmungen von Art. 13 der ital. Gesetzesverordnung Nr. 49 aus dem Jahr 2014 „Umsetzung der EU-Richtlinie EEAG 2012/19 über Elektro- und Elektronik-Altgeräte“ gibt das Symbol der durchgestrichenen Abfalltonne an, dass das Produkt nach dem 13. August 2005 auf den Markt gebracht wurde und am Ende seiner Lebensdauer nicht als normaler Haushaltsabfall sondern separat zu entsorgen ist. Alle Geräte bestehen zu mehr als 90 % des Gewichts aus recycelbare Metallwerkstoffen (Edelstahl, Eisen, Aluminium, verzinktes Blech, Kupfer usw.). Bei der Entsorgung des Geräts muss darauf geachtet werden, dass negative Umwelteinflüsse durch dieses vermieden und Ressourcen geschont werden, indem das Prinzip „Wer verschmutzt, zahlt“ angewandt wird sowie durch Vorbeugung und Vorbereitung zu Wiederverwendung, Recycling und Verwertung. Die unsachgemäße Entsorgung des Produkts führt zur Anwendung der von den geltenden gesetzlichen Bestimmungen vorgesehenen Sanktionen.
