Slide out Bonded Carbon Filter and lift out of reusable cassette (if fitted)
Replace every 6 months or 1500 hours of use

- 8 After refitting all filters,
replace the filter door and screws and close the
baffle door.

Important Operational information:

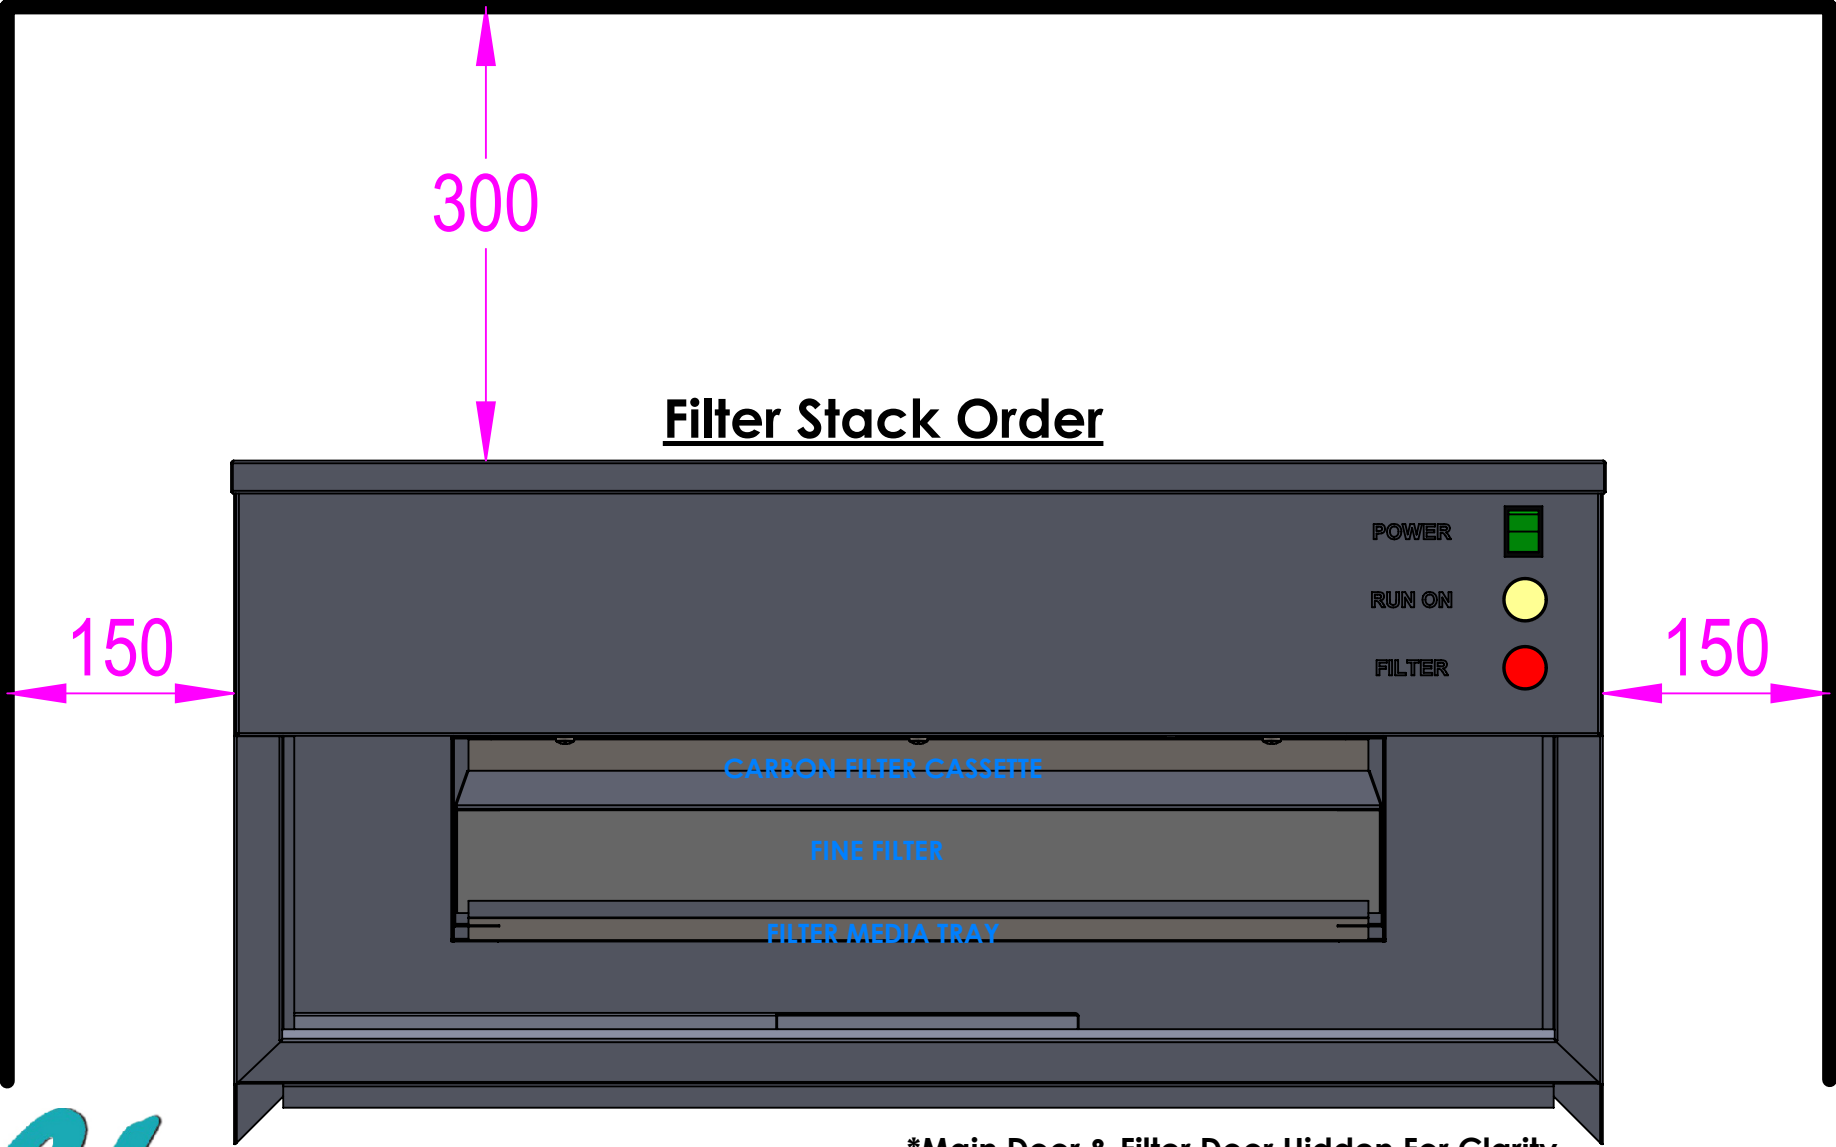

- It is important to ensure a minimum of 15 air changers per hour background ventilation within the room where the hood is to be situated.
- See dimensions overleaf for minimum clearances around the unit to allow for sufficient airflow
- The hood unit must be connected to a mains power supply during all phases of operation.
- The hood unit must be turned on at all times during the ovens heating up and use.
- it is important that the top of the unit should be uncovered to allow air to escape the unit.
- The hood has a built in '2 hour run on' circuit that will ensure the fan is on until the oven is cool enough after use, the oven doors should be left open during this phase to reduce the cooling time required.
- If the red filter light comes on all filters must be inspected for damage or build up.
